

# **Approved Product List for Soil Retention Blanket Mulch**

**Delaware Department of Transportation  
Dover, DE 19903**

**September 25, 2008**

The Approved Product List (APL) is developed using field performance of products that have been used extensively in projects by Delaware Department of Transportation (DelDOT) with satisfactory results, performance standards and evaluation by NTPEP Index Tests of Rolled Erosion Control Products, a cooperative effort by AASHTO and the Erosion Control Technology Council (ECTC). NTPEP (National Transportation Product Evaluation Program) Index Tests is a cooperative effort by representatives of manufacturers of rolled erosion control blankets and AASHTO.

Moreover, because of environmental concerns, DelDOT has used extensively only Erosion Control Blankets (ECBs) that have 100 percent biodegradable, natural, organic fiber nettings wherever these ECBs can withstand the design shear stresses. Therefore, the following guidelines will be followed:

1. On slope protection and on grass channels that have maximum shear stress at design flow of less than or equal to 2 pounds per square foot (96 Pascals), all Rolled Erosion Control Products (RECP) will have 100 percent biodegradable, natural, organic fiber nettings. These are short-term biodegradable blankets.
2. On grass channels that have maximum shear stress at design flow greater than 2 pounds per square foot (96 Pascals), only RECPs that are classified as long-term non-degradable blankets will be used. These products are termed Turf Reinforcement Mats (TRMs).

In order for a product to be added to DelDOT's Approved Product List and be eligible for use in DelDOT's construction and maintenance works, the product must meet the above guidelines.

Pre-approval procedures and the current APL may be obtained by writing to the Stormwater Engineer, Delaware Department of Transportation, P. O. Box 778, Dover, DE 19903, calling 302 760 2251, or viewing DelDOT's web page at '<http://www.deldot.gov/information/business/>'. As new products are tested, those products meeting DelDOT requirements will be added to the APL.

DelDOT reserves the right to remove a product from the APL or change its' classification when field performance proves the product to be unsatisfactory.

# Soil Retention Blanket Mulch (SRBM)

## DelDOT Approved Product List, September 25, 2008

SRBM Type and DelDOT Bid Item Number	Approved Products	Criteria
Type 1, Item No. 735531	BonTerra EcoNet ENCS2 American Excelsior Company Curlex Net Free East Coast Erosion Blankets ECC-2B North American Green S150BN North American Green SC150BN Western Excelsior, Excel CS-3 All Natural Anti-wash / Geojute Econo-Jute ErosionControlBlanket.com, S32BD Western Excelsior, Excel SR-1 All Natural  <u><b>Plus Type 5 blankets</b></u>	TxDOT/TTI 98 The Erosion Lab 03 NTPEP Index Tests 04 TxDOT/TTI 98 DelDOT Approved NTPEP Index Tests 06 TxDOT/TTI 91 TxDOT/TTI 99 NTPEP Index Tests 07 NTPEP Index Tests 07
